

Dear Designer, Academician, Artist, Curator, Manufacturer...

As 4T Design and Design History Society Association, we will be glad to see you among us, as our esteemed friends, designer self or devoted to design. 4T Design and Design History Society is an association established to bring together all the stakeholders involved in design. The main purpose of our association is to increase public awareness and perception of design and to be able to implement qualified studies in the fields of design theory, application and history. Our association was officially launched on 4th of June 2014, but has a history of more than 12 years of shared aims and endeavor with uninterrupted symposium / conference experiences under the names of 4T and 5T.

4T as an Izmir-based organization, is open to everyone from Turkey sharing the same purposes and the same enthusiasm. We believe that we will become a more effective and productive association with the increase of the number and the variety of our members. Therefore, as 4T Design and Design History Society Association, we invite you to become a member of any field who is interested in design and design history, who works in this field or who wants to help and support employees. I would like to thank you for your interest in applying for membership.

Yours truly,

*Erdem Erten, President
4T Design and Design History Society Association*
